Conveyor Belt Splicing on Steel Cord Belts

Trained GCI technicians make splicings on the belt unit and ensure perfect work. On request, GCI can supply splicing kits and can provide mobile vulcanization units.

Conveyor Belt Splicing on Fabric Belts, PVC

GCI technicians can make splicings on rubber and/or PVC belts. Qualified splicing work using GCI repair materials ensure high operational security. GCI offers materials and equipment for all types of applications.

Conveyor Belt Repairs on Site

The GCI service section can repair all damages on the conveyor belts. Decades of experience make possible repair of punctures, lengthways tears, crossways breakages or edge damage. On request, GCI repair materials and GCI vulcanization units can be made available to you.

Other Installation Performances on Site

GCI technicians provide installation help and ensure perfect work on drum linings, adding linings and incorporating scrapers of all types. The GCI product range includes the necessary rubber materials, tools and devices.

Damage Assessment and Consulting on Site

On request, GCI technicians can assess conveyor belt damage, etc. on site. In addition to examining damage on site, competent and technically relevant solutions can be proposed and various options are being offered.

Manufacturing / Planning

Project Planning and Design
Assembly/Installation
Screens, Crushers
Manufacturing of conveyor systems, transfer buckets, - of hoppers, - of special conveyor belts

Maintenance

Repair
Modification
Commissioning
Alignment of Conveyor belt

Spare Parts

Pulleys
Impact rollers
Impact bars
Bearings
Wipers and accessories
Plough wipers for drums
Rubber Belts
Rubber wear elements
Lateral rubber guides
Drum laggings
Belt supporting stations
Support rollers, return rollers

VULCANIZING PRESSES • CONVEYOR BELTS • SPLICING & REPAIR MATERIAL • BELT EQUIPMENT • RUBBER LINING • PULLEY LAGGING • BELT CLEANERS • TRAINING
